

**Who Is Sean Kubin, And What Are
Dental Offices Saying About The
Results They've Achieved?**

Who is Sean Kubin?

Sean is the Chief Solutions Architect at Standard Computer.

His team of rock-star IT Professionals manages the Technology that is needed to make Dental offices run efficiently and securely. Sean's experience and critical thinking allows solutions to be developed that can benefit from the very best that the market has to offer. All members of the team are trained to build "Standard Operating Procedures" for new problems as they are discovered thus preventing issues from occurring again in the future. The aggressive problem solving culture, robust internal 'Standard Operating Procedures' and our proprietary security whitelist gives our Dental clients unbeatable security, stability, and speed.

What Are Clients Saying About Standard Computer results?

“

Ray Dental, Little Rock

I already had a respectable IT company, but I found out that I was missing out on the absolute best computer support available. I also found out that I had quite a few problems with my network that could have caused major headaches soon. I was very disappointed that my previous company missed these issues after what I had been paying them. The "team" of Standard Computer was very impressive. They provide 24-hour service, are 100% knowledgeable, and they are 100% appreciative of your business! I have dealt with at least 4 computer gurus during my 24 years of practice and now can relax knowing I'm covered by knowledgeable guys.

Steven Ray, D.D.S.
Owner

If you're not impressed with Standard Computer, I will buy you a BIG MAC with extra cheese!!

”

“

Ted Jolley, DDS

Standard Computer is very efficient, and their employees are great. Problems are addressed/fixed quickly, and equipment is installed swiftly. When we call Standard Computer, we do not have to wait 2-3 days for someone to respond. They are always available immediately. We absolutely recommend their monthly services. The employees are always nice even when I call them early in the morning and wake them up! Our previous IT company took days or weeks to call us back regarding problems with our computers. The guys at Standard Computer are available 24-7, so I have never had to wait.

Gail Holmes,
Office Manager

“

Skinner Family Dentistry

Our backup system was not working. I received a marketing letter from Standard Computer & called right away. I talked to Sean and he came out the very next day. We now have a reliable backup. Sean and his team were able to figure out our needs and issues. We have received prompt attention that we have not received in the past. Everyone has been so helpful. We have been really impressed with the knowledge of the staff.

“

ASAP Smile Center.

Standard Computer delivers comprehensive IT services and specializes in preventative maintenance. In my business, I cannot afford to have a computer or server go down and then wait days for another to be built and for programs to be loaded so it can function. Having a HIPAA certified IT technician really is a stress relief. Other IT companies are behind on staying up to date on electronic HIPAA protocols.

”

“

Boatright Endodontics

Standard Computer is prompt when responding to requests for service...which is very productive for our office. When our practice was changing locations, we needed immediate assistance so our daily routine would not be interrupted. Standard Computer responded and completed the task at OUR convenience.

”

Dr. Boatright
Owner

“

Center for Dental Excellence

The monthly service plan is a savings, but the MAJOR savings is in the computer upgrades. It would take 10 years of monthly fee saving to equal the amount needed to upgrade our computers.

”

Dr. Stephen Strout
Owner

“

Inman Family Dental Clinic

I am confident that our computer system is secure. I am most satisfied about being able to call when there is a problem and having it taken care of immediately. I can only get so much done in the office. I must bring home paperwork every night. The only way to do this is to be able to log in to my computer at the office. I could not do this without having SimpleHelp installed on my home computer.

Ashley Inman
Office Manager

”

“

Monticello Dental Center

We had a computer die and Standard Computer was tasked with coming to our office and installing 3 new computers and upgrading all our computers to Windows 10. They worked through the evening and then spent many hours over the course of several days making sure everything was up and running like we needed it. Their tenacity and dedication to us made us feel like we were their most important client. Everyone is so friendly, knowledgeable, and prompt in taking care of our needs.

”

Kimberly Prince
Team Lead

“

Sheridan Dental Center

When a computer in an OP crashed, Standard Computer came down the very next morning with a new one. On two other occasions, they remoted in and fixed x-ray and keyboard issues on the spot. Prompt services are always provided by Standard Computer. All the staff is very knowledgeable and friendly.

”

Pamela Gillis
Office Manager

“

Malvern Dental Center

We had an issue that made a big impact on our daily routine. Standard Computer came and fixed the problem. The company seems to really care about how things are set up and instantly wanted to correct things that may cause any issues in the future.

Jennifer Paul
Team Lead

”

Gregory Stafford DDS
Owner

“

Downtown Dental Care

Different dental offices have unique needs. I represent an office that is very dependent on our technology and needs constant help and attention. But, as a dentist and owner, I have a lot of different things on my plate and priorities shift around. Standard Computer helps me to have control of the technology piece of the plate.

”

”

“

Endodontic Associates

A couple of months ago, we were having issues with our dental software and we were no longer able to take x-rays on patients. I was able to call Standard Computer before our office was open and they immediately started working to fix our problem. We did end up having to reschedule one patient, but just one. That issue could have ruined our whole workday had it not been fixed so promptly.

Dr. Amir Mehrabi
Owner

”

“

Knight Dental Care

Standard Computer is reliable and easy to get in touch with. Anytime that I have a problem, the team can remote in and fix it. Time is very crucial when something goes wrong, but I do not have to worry about Standard Computer. They get us back up and running quickly.

Dr. William Knight
Owner

”

“

Kim Kosmitis, DDS

Standard Computer never fails to amaze me with their quick responses. They are always able to fix our IT problems and always glad to help.

Beth Owens
Office Manager

”

“

Skinner Family Dentistry

I am not the most technical person at all, so I appreciate that no one at Standard Computer makes me feel dumb when I am having an issue big or small. Everyone is always so friendly and helpful.

Lori Davis
Office Manager

”

“

Dr. Sean Gore
Owner

ASAP SMILE CENTER

Immediate results. When I call with a minor issue, it is looked into right then, and I get an answer in minutes. Having a tech be able to virtually and securely evaluate and fix an issue is a life/practice saver. No more waiting for a tech that must drive to my place of business to look at the computers or servers.

”

“

Jacksonville Dental Center

We are so much more efficient now. I never have a hard time getting a hold of someone when we are having tech issues and that has been a huge improvement.

Ryan Bates
Office Manager

”

“

Banister Family Dental

I like that IT help is just a phone call away and I've been impressed with the how Standard will remote in to fix whatever issue I have. I have never had to wait to have anything looked at. It is okay that we are "computer illiterate" because we know you are a phone call away when something starts giving us fits.

”

Dr. Bannister
Owner

“

Pine Bluff Dental Center

Proactive service- when something breaks or goes down, we cannot continue our day being a mostly digital office. Having a team that tries to stay ahead of the problems is a huge plus!

Stephanie Hinkle
Office Manager

”

“

Diemer Family Dental

I like how I can get a hold of someone when needed. Customer service and installation services have been great. I was very pleased when you went above and beyond when I moved offices and setup my new server room. I have been able to rely on you to take care of my IT issues, and I know it will be handled correctly.

”

Dr. Chase Diemer
Owner

Angela Wilson
Front Office

“

DENTAL HEALTH CENTER

We can call anytime; they are always there to help. I love that someone is able to answer the phone at 7am so that my patient care is not interrupted.

”

“

Ted M Pinney DDS

I do not have to do anything but call Standard Computer. It takes a huge load off the staff not having to be on the phone trying to handle issues. Response time is fast, and the staff is very knowledgeable.

Mary Seymore
Office Manager

”

Dr. Michael L. Blanscet
Owner

“

BLANSCET ENDODONTICS

I have many positive experiences to share: Most recent was a call on last Friday afternoon to help with a sensor driver that Carestream would not fix. Sean and his team were on it, and the team worked over the weekend to make sure we were up and ready to go on Monday morning. Personalized service from professionals that truly care about meeting our IT needs.

”

“

Dr. Ned Alley

I most like the offsite customer service. Any dealings I have had with Standard Computer have been positive. The new staff seem to be doing well also. Dealing with a company that values its client's communication is refreshing.

”

Ned Alley
Owner

“

Cantrell Dental

Anytime we ask anything, we are always provided with quick feedback and GREAT customer service. There have been multiple times that I have been up at the office early and called to have something fixed and every task has always been completed before I even end my phone call and customers arrive!

Patience Tamburo
Office Manager

Standard came during our renovation and set up computers in our new operatories alongside the Patterson people. It was mass chaos, but he stuck it out and got us up and running before we opened the next day for patients. It is THAT kind of customer service that keeps us happy!

We have not gone over a day without any technical problems that we have had being solved. Even when our website was not working, the guys quickly got us back up and running so that our patients weren't delayed in making requests for appointments online.

”

“

Stephen W. Boatright, DDS

These guys are so easy to work with... IT is not our expertise, teeth are, and this company treats us wonderfully! Most recently, we had a major power outage which took down our IT & phone system. Standard Computer was instantly available and made sure we were up and running complete with phones! Seriously, the team works well with our dental practice software and pano companies. They have spent hours on the phone researching the best options for us to keep our equipment (not installed by them) working.

Dr. Boatright

Owner

”

“

Dr. Bennett, APMR

We rarely have to call into Standard because we rarely have issues, but we used to call our previous IT guys often. Standard is great in the sense that I feel like I'm talking to a friend when I call in. I like that Sean and I can have direct conversations even though he is the owner. It's not often the owner is very accessible. I am very happy with Standard's IT services, keeping our HIPAA compliance up and updating our EMR at pricing that is impossible to beat.

Dr. Bennett

Owner

”

“

Dr. Maxwell U. Fleming, Jr

Prompt attention and your ability to remote in to address our issues set you part from other companies.

”

Dr. Max Fleming

Owner

“

Centers for Dental Excellence.

I used to have only one choice for my IT services, outside of the large dental supply companies, prior to meeting Sean and his team. I was desperately needing computer upgrades in all three of my locations and was looking at an EXTREMELY large estimate to have this completed.

Sean and his team came in and found the components that needed upgrading and I saved a fortune by only replacing the items that absolutely needed to be replaced. In addition, they organized and streamlined my IT "closet" like never before, which simplified the maintenance of my equipment.

I would highly recommend Sean and his team to any dentist that is looking to save on IT costs without sacrificing quality or competence.
